

Volunteer Opportunity for North Eugene High School

FIRST is an organization that designs a robotics challenge each year for school-based teams to complete with robots built from a small kit of parts. We are working to complete our first robot for our first competition: Cascade Effect. Working together as a team, we are learning to overcome many challenges from many different fields. In doing so, we gain skills in fields like mechanical engineering, business, communications, and more. These skills will provide us with the knowledge we will need both in college and beyond as we become a part of tomorrow's workforce. BUT WE NEED YOUR HELP!

WE NEED volunteer mentors who could help guide the team in the various aspects of the build (programming, wiring, building, designing, fundraising, marketing)

We meet on Tuesdays and Thursdays from 3:30-5:30pm in the Math Center of North Eugene High School. If you have any questions, please contact one of our coaches. Anthony Harlan: 541-232-4507 or Cody Rosenberg: 310-259-4561.

Be a part of N.E.R.D.!!!
